TECHNICAL PROJECTS

Instagram - [Live Site](#) | [GitHub FrontEnd](#) | [GitHub BackEnd](#)

A React hooks application of the clone of Instagram. It has the same functionality as a regular Instagram app.

- Designed a RESTful API database schema using PostgreSQL
- Used React Hooks to manage state and to keep information organized
- Integrated Firebase to login, sign-up, and upload pictures
- Deployed with Heroku for backend and Netlify for frontend

Triphikers - [Live Site](#) | [GitHub](#)

A React hooks application allows users to connect travelers who want to travel with others and explore new places.

- Used SQL, and Express to create a database in the backend
- Implemented Material UI and Vanilla Framework for styling
- Integrated Google API to allow search by countries and create hotspots
- Utilized Firebase for the account creation process
- Engineered controlled forms for user login, sign-up, and user recommendations

Our Canvas - [GitHub Frontend](#) | [GitHub Backend](#)

A React application where users can search another user for their interest in arts.

- Created RESTful API database schema backend using PostgreSQL
- Incorporated CSS for styling
- Manipulated and traversed the DOM using event handlers
- Used [Trello](#) to keep in track overflow of the Project
